Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 January 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4-6, 8-10 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Itagaki (JP 59-164450)

An elevator comprising a hoisting rope 4 set having hoisting ropes of a substantially round cross-section, a counterweight 6 and an elevator car 5 suspended from the hoisting ropes and at least one pulley provided with rope grooves, the at least one rope pulley 2 being a traction sheave coated with a material 9 increasing the coefficient of friction, the traction sheave being driven by a drive machine to move the hoisting rope set, at least the traction sheave 9 forms together with the hoisting rope set a material pair made of different materials (see abstract) that allows the hoisting rope to bite into the traction sheave after the coating on the surface of the traction sheave has been lost, and where the elevator is usable when the coating on the surface of the tractions she has been lost.

In regards to claim 6 and 10, Itagaki discloses a material 10a under the coating 9, where the coating and the material under the coating are made of different materials.

In regards to claim 8 and 9, Itagaki discloses traction sheave groove having a V-shape (Fig. 6-10).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Itagaki in view of Piech et al. (US 6,267,205).

Piech teaches an elevator rope having a diameter between 3-5 mm (Col. 5 line 11).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the rope of Itagaki to include a rope having a diameter between 3-5mm as suggested by Piech, to reduce wear.

Response to Arguments

In regard Examiner's indication of allowability of claim 14 in the office action dated 11 January 2007, the allowability was withdrawn in the office action dated 31 July 2007 as anticipated by Itagaki.

In regard to Applicant's argument that the two materials referred to in claim 1 are the rope and the material of the traction sleeve, Itagaki discloses the rope 4 made of a different material than traction sleeve 9.

Although Itagaki fails to disclose how the sheave would operate if the coating has been lost, it is inherent that the sheave would not be made unusable. The efficiency at which the

Art Unit: 3654

sheave operates with the coating would concededly be reduced. In addition, if the material 9 of Itagaki is lost, a second material 10a would provide some frictional engagement.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
